- ☐ Source requested case-by-case 112(g) or (j) determination
- ☐ Application proposes new control technology
- ☒ Certified by responsible official
- ☒ Diagrams or drawings included
- ☐ Confidential business information (CBI) submitted in application
- ☐ Pollution Prevention Measures
- ☐ Area is non-attainment (list pollutants):

**SOURCE DESCRIPTION:** Municipal Solid Waste Landfills that commenced construction, reconstruction or modification on or after May 30, 1991. These landfills usually will have one or more leachate storage tanks. Many also accept asbestos containing waste which is placed in a separate section. Landfills which emit 50 megagrams or more of non-methane organic compounds (NMOC) are required to install a collection and control system which will control 98% of the collected NMOC. Landfills will have fugitive emissions from haul roads, stockpiles and yards.
